COMPARISON

12 mo before vs first 12 mo under PPC Guru

01 Executive Summary

True Life Wellness Physio is a physiotherapy clinic that had been advertising on Google Ads for several years. The account history shows steady traffic but a low conversion rate under its earlier structure. After PPC Guru rebuilt the account around higher-intent search and strengthened conversion tracking, monthly conversions climbed from an average of about 1.6 to roughly 16, and cost per conversion fell from \$385 to \$34 — all at a slightly lower monthly ad spend. This case study compares the 12 months before the transition (May 2021 – Apr 2022) with the first 12 months under PPC Guru management (Apr 2023 – Mar 2024), based on the account's Google Ads history in CAD.

02 Client Overview

Client	True Life Wellness Physio	Industry	Physiotherapy / rehabilitation clinic
Main service	Physiotherapy & wellness treatment	Platform	Google Ads (Search)
Objective	Local lead generation — bookings & calls	Billing currency	CAD
PPC Guru transition	≈ April 2023 (per account history)	Reporting period	Jan 2021 – Jul 2026

03 The Opportunity

True Life Wellness Physio already had a multi-year Google Ads presence, so the clinic was reaching searchers and generating clicks. The available account history shows that clicks and impressions were

consistent, which pointed to a clear opportunity: convert more of that existing traffic into booked appointments. Under the earlier structure the conversion rate sat below 1%, suggesting room to focus spend on higher-intent physiotherapy searches, tighten keyword and match-type coverage, and strengthen conversion tracking so that calls and booking requests were measured reliably. In short, the demand was already there — the opportunity was to build a more conversion-focused paid search structure around it and give the clinic clearer visibility into which searches produced real enquiries.

04 PPC Guru’s Strategy

PPC Guru rebuilt the account with a lead-generation-first structure and re-established clean conversion measurement.

- Restructured the account into focused search campaigns targeting high-intent physiotherapy and injury-treatment queries.
- Rebuilt keyword coverage with tighter match types and an ongoing negative-keyword programme to filter low-intent traffic.
- Strengthened conversion tracking so booking form submissions and phone calls were measured consistently.
- Aligned ad copy and extensions with the clinic's core services and local service area.
- Concentrated budget on the campaigns and search terms that produced booked appointments.
- Applied ongoing search-term review and bid optimization to compound results month over month.

05 Performance Comparison

Metric	Before (May 21–Apr 22)	Under PPC Guru (Apr 23–Mar 24)	Change
Ad Spend	\$7,320	\$6,548	▼ 11% lower
Conversions	19	191	▲ 905% increase
Cost per Conversion	\$385.24	\$34.28	▼ 91% reduction
Conversion Rate	0.8%	9.5%	▲ 10x higher

06 Key Results

- ✓ Tracked conversions increased from 19 to 191 across matched 12-month periods — a 905% increase.
 - ✓ Cost per conversion dropped from \$385.24 to \$34.28, a 91% reduction.
 - ✓ Conversion rate improved from roughly 0.8% to 9.5%.
 - ✓ The stronger results were achieved at a slightly lower ad spend (\$7,320 → \$6,548).
 - ✓ Lead generation became far more consistent, averaging about 16 conversions per month under PPC Guru.
-

09 First-Month & Early-Stage Results

Performance improved quickly once the new structure launched. The first 90 days under PPC Guru established the conversion-focused baseline that later months built on.

Period	Spend	Conversions	Cost / Conversion
First 30 days (Apr 2023)	\$154	8	\$19.24
Days 31–60 (May 2023)	\$439	4	\$109.76
Days 61–90 (Jun 2023)	\$606	25	\$24.23

07 Business Impact

For a physiotherapy clinic, the value of paid search is measured in booked appointments, not just clicks. By focusing spend on higher-intent searches and measuring bookings and calls accurately, PPC Guru turned a largely traffic-driven account into a dependable source of appointment requests. The clinic moved from a handful of tracked conversions each month to a steady stream of enquiries at a fraction of the previous cost, giving the practice a predictable local lead pipeline and a clearer picture of which searches drive real patients. That efficiency also created room to scale confidently, because each additional dollar of budget now maps to measurable demand.

08 Why the Campaign Worked

- Higher-intent keyword and match-type targeting focused spend on searchers ready to book.
 - Stronger conversion tracking made booking requests and calls measurable and optimisable.
 - Continuous search-term and negative-keyword refinement reduced wasted clicks over time.
 - Budget was concentrated on the campaigns and queries that produced appointments.
 - A clean, conversion-first account structure created a foundation for ongoing optimization.
-

10 Conclusion

True Life Wellness Physio shows what a conversion-focused rebuild can do for an established local advertiser. With the same demand and a slightly smaller budget, the clinic moved from fewer than two tracked conversions a month to roughly sixteen, while cost per conversion fell by more than 90%. The transition reflects the compounding value of a clear campaign structure, reliable measurement, and disciplined ongoing optimization — the foundation PPC Guru continues to build on for the account.

Ready to grow with measurable advertising?

Looking to turn physiotherapy search traffic into booked appointments? PPC Guru helps Canadian clinics build conversion-focused Google Ads campaigns backed by transparent reporting and ongoing optimization.

Advertising results vary based on industry, market conditions, competition, budget, campaign history, offer, website experience, conversion tracking, and other factors. The results presented in this case study reflect the specific account and reporting periods shown and do not guarantee future performance.
