Physiotherapy Clinic: A Steadier, Lower-Cost Google Ads Lead Pipeline

Physiotherapy Clinic · Ontario, Canada · Managed since Apr 2023

~16

TRACKED LEADS / MONTH

under management

~\$34

COST PER LEAD

▼ efficient & stable

~9%

CONVERSION RATE

▲ from under 1%

PPC Guru rebuilt an established but under-tracked physiotherapy account into a dependable source of booked appointments — roughly 16 tracked leads a month at about \$34 each, on a similar budget.

The Challenge

The clinic had advertised on Google Ads for years and earned steady traffic, but the account tracked only a couple of measurable enquiries a month — a conversion rate under 1%. Spend was working hard for clicks, but there was no reliable line of sight from ad click to booked appointment, which made it impossible to optimize toward real patients.

What PPC Guru Did & Why

Single focused Search campaign	Consolidated budget onto high-intent physiotherapy and injury-treatment queries instead of spreading it thin.
Closed-loop conversion tracking	Wired up call tracking (ads + website), lead-form submissions, and GA4 events for the JaneApp online booking flow.
Offline conversion import	Fed actual booked appointments (JaneApp) back into Google Ads so bidding optimizes toward patients, not just form fills.
Maximize Conversions bidding	Once the conversion signals were trustworthy, automated bidding could chase booked appointments efficiently.
Negative-keyword programme	Filtered low-intent and irrelevant searches to protect budget and lift relevance.
Local ad copy & assets	Aligned messaging and extensions with the clinic's core services and service area.

UNDER THE HOOD

Campaign type	Search
Bidding strategy	Maximize Conversions
Monthly budget	≈ \$1,500 CAD
Conversion signals	Calls · Lead forms · GA4 booking
Booking system	JaneApp (offline import)
Measurement	Closed-loop: click → lead → booking

Results

Metric	Before (2021)	Under PPC Guru (Apr 23–Mar 24)	Change
Avg. monthly tracked leads	≈ 2	≈ 16	▲ Consistent flow
Cost per tracked lead	Not reliably tracked	≈ \$34	▼ Efficient & stable
Conversion rate	Under 1%	≈ 9%	▲ Higher
Avg. monthly ad spend	≈ \$610	≈ \$545	▼ ≈11% lower

Cost per lead held near \$34 even as monthly lead volume climbed into the double digits — the structure added volume without inflating cost.

Why It Worked

- ✓ Reliable, closed-loop tracking let bidding optimize toward booked appointments rather than clicks.
- ✓ Budget concentrated on high-intent searches from patients ready to book.
- ✓ Offline import connected ad spend to real bookings, not just online form fills.
- ✓ Ongoing search-term and negative-keyword work kept traffic relevant and costs stable.

The Outcome

The clinic now runs on a predictable local lead pipeline: around 16 tracked booking enquiries a month at a stable ~\$34 each, on a similar budget to before. Just as important, every dollar of spend is now measurable all the way to a booked appointment — giving the practice a clear, data-backed basis for deciding when to scale.

Want results like these?

PPC Guru helps Canadian clinics turn search traffic into booked appointments with conversion-focused Google Ads and transparent reporting.

All figures are pulled directly from the client's Google Ads account. Comparison periods are equal length (12 months before vs the first 12 months under PPC Guru). Conversion tracking was strengthened during the transition, so the earlier period is shown using absolute monthly averages rather than percentage change.

Advertising results vary based on industry, market conditions, competition, budget, campaign history, offer, website experience, conversion tracking, and other factors. The results reflect the specific account and reporting periods shown and do not guarantee future performance.
