~5%

CONVERSION RATE (2026)

▲ from ~1.6% in 2021

~\$56

COST PER GENUINE LEAD

calls · forms · bookings

PPC Guru rebuilt an under-tracked physiotherapy account and scaled it into a dependable lead engine — from about three tracked conversions a month in 2021 to roughly 25 genuine phone, form and booking leads a month in 2026, with full closed-loop tracking.

The Challenge

The clinic had advertised on Google Ads for years and earned steady traffic, but in 2021 the account tracked only about three measurable conversions a month at a conversion rate near 1.6%. Spend was working hard for clicks, but there was no reliable line of sight from an ad click through to a booked appointment — which made it impossible to know which searches produced real patients, or to scale with confidence.

What PPC Guru Did & Why

Single focused Search campaign	Consolidated budget onto high-intent physiotherapy and injury-treatment queries instead of spreading it thin.
Closed-loop conversion tracking	Wired up call tracking (ads + website), lead-form submissions, and GA4 events for the JaneApp online booking flow.
Offline conversion import	Fed actual booked appointments (JaneApp) back into Google Ads so bidding optimizes toward patients, not just form fills.
Maximize Conversions bidding	Once the conversion signals were trustworthy, automated bidding could chase booked appointments efficiently.
Scaled budget on proof	As genuine leads grew, monthly budget was increased roughly 2.3× — investing into a channel that was demonstrably working.
Ongoing search-term hygiene	Continuous negative-keyword and search-term work kept traffic relevant as volume grew.

UNDER THE HOOD

Campaign type	Search
Bidding strategy	Maximize Conversions
Monthly budget (2026)	≈ \$1,430 CAD
Lead signals	Calls · Lead forms · Bookings
Booking system	JaneApp (offline import)
Measurement	Closed-loop: click → lead → booking

Results

Metric	Then (2021)	Now (2026, Jan–Jul)	Change
Avg. monthly leads (calls / forms / bookings)	≈ 3	≈ 25	▲ Sustained growth
Conversion rate	≈ 1.6%	≈ 5%	▲ Higher
Avg. monthly ad spend	≈ \$625	≈ \$1,430	Scaled with results
Cost per genuine lead	Not reliably tracked	≈ \$56	Now fully measured

As results proved out, monthly budget was scaled roughly 2.3× (≈\$625 → ≈\$1,430). The extra investment brought proportionally more genuine leads — not just more clicks.

Average Monthly Genuine Leads by Year

Calls, forms & bookings · Google Ads · CAD

Why It Worked

- ✓ Reliable, closed-loop tracking let bidding optimize toward booked appointments rather than clicks.
- ✓ Budget concentrated on high-intent searches from patients ready to book.
- ✓ Offline import connected ad spend to real bookings, so scaling was based on genuine demand.
- ✓ Ongoing search-term and negative-keyword work kept traffic relevant as volume grew.

The Outcome

Today the clinic runs on a predictable, scalable lead engine: roughly 25 genuine phone, form and booking enquiries a month in 2026, at a conversion rate near 5% — up from about three tracked conversions a month in 2021. Because every dollar of spend is now measurable all the way to a booked appointment, the clinic scaled its budget with confidence and has a clear, data-backed basis for growing further.

PPC Guru helps Canadian clinics turn search traffic into booked appointments with conversion-focused Google Ads and transparent reporting.

[Book a strategy call](#)

All figures are pulled directly from the client's Google Ads account. 'Leads' are phone calls, form submissions and completed bookings only — Google Business Profile local actions and booking-page clicks are excluded so counts reflect genuine enquiries. 2021 is the pre-management baseline; 2026 covers January–July.

Advertising results vary based on industry, market conditions, competition, budget, campaign history, offer, website experience, conversion tracking, and other factors. The results reflect the specific account and reporting periods shown and do not guarantee future performance.
