~\$55

AVG. COST PER LEAD

across clinics

PPC Guru manages Google Ads for a portfolio of physiotherapy and rehabilitation clinics across Canada. Using one repeatable playbook — genuine call and booking tracking, high-intent search targeting, and disciplined optimization — the clinics together generate roughly 105 tracked patient enquiries a month in the most recent quarter (Apr–Jun 2026), at an average of about \$55 per lead.

About the Client

This case study covers a group of physiotherapy, rehabilitation and sports-injury clinics that PPC Guru manages on Google Ads. They range from long-established practices to clinics launched in 2026, and most schedule patients through booking systems such as JaneApp. For every one of them, growth depends on a steady flow of new-patient enquiries — mainly phone calls and online bookings from people searching for treatment nearby — which makes reliable measurement of calls and bookings the foundation of the account.

How the Account Came to PPC Guru

The clinics came to PPC Guru in two situations. Some were new to Google Ads or had recently launched and needed a lead-generation account built from scratch. Others had an existing presence — steady traffic, but conversion tracking that captured page views and map actions rather than genuine phone-and-booking enquiries. In both cases the opportunity was the same: build a clean, measurable Search account focused on patients ready to book.

The Challenge

What We Analyzed & Planned

PPC Guru applies the same audit to each clinic: confirm what is actually being tracked, map the high-intent treatment searches, and identify where budget is going to informational or low-value clicks. The shared plan is measurement first, then concentrate spend on the searches that produce booked appointments, then scale only where the booking data proves it.

- Rebuild conversion tracking to capture phone calls, form submissions and completed bookings — importing bookings as offline conversions where the clinic's system supports it.
- Separate treatment-intent searches from informational queries and general wellness terms.
- Consolidate into focused Search campaigns so budget and conversion data are concentrated.
- Scale budget per clinic only once genuine lead volume and cost per lead are proven.

What PPC Guru Did & Why

Genuine-lead tracking	Call tracking plus booking imports so each clinic optimizes toward real patients, not clicks or map views.
High-intent Search structure	Focused campaigns on physiotherapy and injury-treatment queries in each clinic's service area.
Maximize Conversions bidding	Automated bidding toward booked appointments once the conversion signals were trustworthy.
Per-clinic budget scaling	Budget increased only where booking data confirmed the channel was working.
Ongoing search-term hygiene	Continuous negative-keyword and search-term work to keep traffic relevant per clinic.

UNDER THE HOOD

Platform	Google Ads (Search)
Bidding	Maximize Conversions
Lead signals	Calls · Forms · Bookings
Booking systems	JaneApp & similar (offline import)
Measurement	Closed-loop: click → lead → booking
Clinics in portfolio	6 (this study)

Cost & Efficiency by Clinic (Q2 2026)

Each clinic runs on the same playbook but at its own budget and maturity. Cost per lead reflects local competition and how long the account has been optimized.

Clinic	Cost per lead	Conversion rate	Managed since
True Life Wellness Physio	≈ \$36	≈ 7%	Apr 2023
Rehab Clinic	≈ \$63	≈ 4.3%	Late 2022
NorthYork Healthcare	≈ \$35	≈ 14%	Feb 2026
Palmdale Health Center	≈ \$59	≈ 9%	Feb 2026
Blockline Physiotherapy	≈ \$56	≈ 13%	May 2026
Rehab2Go (mobile physio)	≈ \$84	—	Mar 2026

Results

Metric	Before / at launch	Now (Q2 2026, leads/mo)	Change
True Life Wellness Physio	≈ 3	≈ 39	▲ Strong growth
Rehab Clinic	Not measured*	≈ 22	▲ Now measured
Blockline Physiotherapy	12	≈ 14	▲ New account, growing
NorthYork Healthcare	2	≈ 12	▲ Strong growth
Palmdale Health Center	1	≈ 9	▲ Strong growth
Rehab2Go (mobile physio)	7	≈ 9	▲ Early growth

* Rehab Clinic's earlier account tracked map and page actions rather than genuine leads, so its pre-rebuild lead count isn't directly comparable. The portfolio mixes long-managed clinics (True Life since 2023, Rehab Clinic since late 2022) with accounts launched in 2026, which are still ramping.

Monthly Leads by Clinic (Q2 2026)

Genuine leads (calls, forms & bookings) · Google Ads · CAD

Why It Worked

- ✓ One repeatable, measurement-first playbook applied to every clinic.
- ✓ Genuine call-and-booking tracking so budget chases real patients.
- ✓ High-intent local targeting matched to each clinic's services and area.
- ✓ Per-clinic budget decisions grounded in booking data, not guesswork.

Why Booking-System Tracking Matters for Clinics

Several of these clinics schedule patients through JaneApp or similar systems. Where the system supports it, PPC Guru imports completed bookings back into Google Ads as offline conversions, so automated bidding optimizes toward patients who actually book — not toward whoever clicks a 'Book' button or a Google Business Profile map pin. That closed loop is the single biggest reason the clinics generate genuine enquiries efficiently instead of paying for low-value actions.

Lessons for Physiotherapy Clinic Owners

- 1 Track phone calls and completed appointments — not button clicks, map views or page visits.
- 2 Separate treatment-intent searches from informational and general-wellness queries.
- 3 Let a new account gather enough conversions before trusting automated bidding.
- 4 Scale budget only after genuine lead volume and cost per lead are proven.
- 5 Review the actual search terms continuously and keep the negative-keyword list current.

The Portfolio Today

Across six physiotherapy and rehabilitation clinics, PPC Guru now delivers roughly 105 genuine patient enquiries a month at an average of about \$55 per lead in the most recent quarter — with the longest-managed clinics running most efficiently and the 2026 launches still ramping. PPC Guru also runs Meta lead-generation for physiotherapy (for example, True Life Wellness Physio's Meta account grew from 32 to 50 lead-form enquiries a month), giving clinics an omnichannel option. The common thread is measurement: because every clinic tracks leads through to a booking, each one can scale with confidence.
