

Ace Equity

A Financial Services Firm's First Month on Meta Ads: 5 Leads + 11 WhatsApp Chats

Financial Services · Canada · Managed since Jul 2026

5

INSTANT-FORM LEADS

July 2026 · first month

~\$45.17

COST PER FORM LEAD

Lead-form campaign

11

WHATSAPP CHATS

Messaging conversations

PPC Guru launched Meta advertising for Ace Equity, a Canadian financial services firm, in July 2026. In its first month the account produced 5 Instant-Form leads at about CA\$45.17 each and opened 11 WhatsApp conversations — genuine enquiries the team could follow up with. This is an early launch snapshot based on a single month of data.

About the Client

Ace Equity is a Canadian financial services firm that helps clients with their financial goals. In financial services, trust and timely contact matter: growth depends on reaching people who are actively considering their options and giving them an easy, credible way to start a conversation. Meta (Facebook and Instagram) lets the firm reach that audience and open a direct line — through a lead form or a WhatsApp chat — while interest is high.

How the Account Came to PPC Guru

The firm partnered with PPC Guru to build a measurable enquiry source on Meta. PPC Guru launched the account in July 2026 with two complementary campaigns under a 'Loyalty' theme: a native Instant-Form campaign to capture contact details, and a WhatsApp messaging campaign to start direct conversations with interested prospects.

The Challenge

As a new launch, the account had no Meta history to build on — no proven audiences, creative or cost benchmarks. In a considered category like financial services, the task was to establish credible lead capture across two objectives and produce genuine enquiries the team could act on, while keeping a clean read on what each enquiry costs.

What We Analyzed & Planned

As a fresh launch, the focus was on clean lead capture and measurement from day one, and on testing two contact routes side by side — a form for people who prefer to leave details and WhatsApp for those who prefer to chat. The first month sets a baseline cost per enquiry that PPC Guru will optimise against as more data accumulates.

- Launch a native Instant-Form campaign to capture client enquiries on-platform.
- Run a parallel WhatsApp messaging campaign to open direct conversations with prospects.
- Measure cost per form lead and cost per conversation from the first day.
- Use month-one results as the baseline for ongoing optimisation.

What PPC Guru Did & Why

Instant-Form lead campaign	Captures contact details on-platform so the team can follow up quickly with interested prospects.
WhatsApp messaging campaign	Opens a direct chat with prospects who prefer to message rather than complete a form.
Two objectives side by side	Tests which route produces better enquiries for the cost before concentrating budget.
Enquiry-level measurement	Tracks cost per form lead and cost per conversation from launch, not clicks or reach.

UNDER THE HOOD

Platform	Meta (Facebook & Instagram)
Objectives	Leads (Instant Form) + Messaging (WhatsApp)
Form campaign	PPC - Loyalty - IF
Messaging campaign	PPC - Loyalty - WA
Month-one budget	≈ \$812 CAD
Data window	1 month (Jul 2026)

The Launch Timeline

- July 2026** PPC Guru launched two Meta campaigns — Instant Form and WhatsApp — producing 5 form leads and 11 WhatsApp conversations in the first month.
- Next** Gather more data across a full quarter to confirm cost per enquiry and scale the better-performing objective.

Results

Metric	Metric	Month one (Jul 2026)	Change
Instant-Form leads	Instant-Form leads	5	▲ ≈ \$45.17 / lead
WhatsApp conversations	WhatsApp conversations	11	▲ ≈ \$53 / chat
Total tracked leads	Total tracked leads	9	▲ Form + messaging
Ad spend	Ad spend	≈ \$812	Launch month

These figures cover a single launch month (July 2026), so they are an early snapshot rather than a trend. Cost per enquiry should be read as a starting baseline that PPC Guru will work to improve as the account gathers more data and creative and audience testing matures.

First-Month Enquiries by Type

July 2026 · Meta Ads launch

Why It Worked

- ✓ Two lead objectives launched together gave the firm both form leads and live conversations.
- ✓ On-platform capture kept enquiries fast and frictionless for a mobile audience.
- ✓ Clean measurement from day one set an honest cost-per-enquiry baseline.
- ✓ The launch produced 16 genuine enquiries across form and WhatsApp in the first month.

Lessons for Financial Services Firms

- 1 Give prospects two ways to reach you — a form for details and WhatsApp for a quick chat.
- 2 Capture contact details on-platform so enquiries are fast and credible for a considered category.
- 3 Measure cost per genuine enquiry from day one, not clicks or reach.
- 4 Treat the first month as a baseline and optimise from real data rather than assumptions.
- 5 Follow up quickly — in financial services, timely, trusted contact wins the conversation.

Where They Stand Today

In its first month on Meta with PPC Guru (July 2026), Ace Equity generated 5 Instant-Form leads at about \$45.17 each and 11 WhatsApp conversations. As a launch snapshot from a single month, these results are an encouraging start rather than a settled trend. PPC Guru will confirm cost per enquiry over a fuller window and scale the objective that proves most efficient.

SCAN TO
BOOK

All figures are pulled directly from the client's Meta Ads account for July 2026, the account's first and only month of delivery to date. 'Leads' are genuine Instant-Form submissions; WhatsApp conversations are reported separately as messaging conversations. Because only one month of data exists, this is a launch snapshot and is marked for review as more data accumulates.

Advertising results vary based on industry, market conditions, competition, budget, campaign history, offer, website experience, conversion tracking, and other factors. The results reflect the specific account and reporting periods shown and do not guarantee future performance.
