A Real Estate Agent's First Month on Meta Ads: 8 Leads + 8 WhatsApp Chats

Real Estate · Canada · Managed since Jul 2026

8

INSTANT-FORM LEADS

July 2026 · first month

~\$19.33

COST PER FORM LEAD

Lead-form campaign

8

WHATSAPP CHATS

Messaging conversations

PPC Guru launched Meta advertising for a Canadian real estate agent in July 2026. In its first month the account produced 8 Instant-Form leads at about CA\$19.33 each and opened 8 WhatsApp conversations, giving the agent 16 genuine buyer and seller enquiries to follow up. This is an early launch snapshot based on a single month of data.

About the Client

Sold by Kaushik is a Canadian real estate professional who helps buyers and sellers through the property process. For an individual agent, a dependable flow of enquiries — people ready to talk about buying or selling — is the engine of the business. Meta (Facebook and Instagram) lets an agent reach local prospects and open a direct conversation, whether through a lead form or a WhatsApp chat, at the moment they are considering a move.

How the Account Came to PPC Guru

The agent partnered with PPC Guru to build a measurable lead source on Meta rather than relying on referrals and organic reach alone. PPC Guru launched the account in July 2026 with two complementary campaigns: a native Instant-Form campaign to capture contact details, and a WhatsApp messaging campaign to start direct conversations with interested prospects.

The Challenge

As a new launch, the account had no Meta history to build on — no proven audiences, creative or cost benchmarks. The task was to establish reliable lead capture across two objectives and produce genuine enquiries the agent could act on, while keeping a clean read on what each enquiry costs.

What We Analyzed & Planned

Because this is a fresh launch, the priority was to stand up clean lead capture and measurement from day one and to test two ways of reaching prospects side by side — a form for people who prefer to leave details, and WhatsApp for people who prefer to chat. The first month establishes a baseline cost per enquiry that PPC Guru will optimise against as more data accumulates.

- Launch a native Instant-Form campaign to capture buyer and seller contact details on-platform.
- Run a parallel WhatsApp messaging campaign to open direct conversations with prospects.
- Measure cost per form lead and cost per conversation from the first day.
- Use month-one results as the baseline for ongoing optimisation.

What PPC Guru Did & Why

Instant-Form lead campaign	Captures a name and contact details on-platform so the agent can follow up quickly with interested buyers and sellers.
WhatsApp messaging campaign	Opens a direct chat with prospects who prefer to message rather than fill in a form.
Two objectives side by side	Tests which route produces better enquiries for the cost before concentrating budget.
Enquiry-level measurement	Tracks cost per form lead and cost per conversation from launch, not clicks or reach.

UNDER THE HOOD

Platform	Meta (Facebook & Instagram)
Objectives	Leads (Instant Form) + Messaging (WhatsApp)
Form campaign	PPC - Sold by kaushik - Instant Form
Messaging campaign	PPC - Sold by kaushik - Whatsapp
Month-one budget	≈ \$496 CAD
Data window	1 month (Jul 2026)

The Launch Timeline

- July 2026** PPC Guru launched two Meta campaigns — Instant Form and WhatsApp — producing 8 form leads and 8 WhatsApp conversations in the first month.
- Next** Gather more data across a full quarter to confirm cost per enquiry and scale the better-performing objective.

Results

Metric	Metric	Month one (Jul 2026)	Change
Instant-Form leads	Instant-Form leads	8	▲ ≈ \$19.33 / lead
WhatsApp conversations	WhatsApp conversations	8	▲ ≈ \$42.70 / chat
Total enquiries	Total enquiries	16	▲ ≈ \$31 blended
Ad spend	Ad spend	≈ \$496	Launch month

These figures cover a single launch month (July 2026), so they are an early snapshot rather than a trend. Cost per enquiry should be read as a starting baseline that PPC Guru will work to improve as the account gathers more data.

First-Month Enquiries by Type

July 2026 · Meta Ads launch

Why It Worked

- ✓ Two lead objectives launched together gave the agent both form leads and live conversations.
- ✓ On-platform capture kept enquiries fast and frictionless for a mobile audience.
- ✓ Clean measurement from day one set an honest cost-per-enquiry baseline.
- ✓ The form campaign delivered leads at about \$19.33 each in its first month.

Lessons for Real Estate Agents

- 1 Give prospects two ways to reach you — a form for details and WhatsApp for a quick chat.
- 2 Capture contact details on-platform so no enquiry slips away to a slow landing page.
- 3 Measure cost per genuine enquiry from day one, not clicks or reach.
- 4 Treat the first month as a baseline and optimise from real data rather than assumptions.
- 5 Follow up with new leads fast — speed to contact matters in real estate.

Where They Stand Today

In its first month on Meta with PPC Guru (July 2026), Sold by Kaushik generated 16 genuine enquiries — 8 Instant-Form leads at about \$19.33 each and 8 WhatsApp conversations. As a launch snapshot from a single month, these results are an encouraging start rather than a settled trend. PPC Guru will confirm cost per enquiry over a fuller window and scale the objective that proves most efficient.

Want results like these?

PPC Guru helps Canadian real estate agents turn Facebook and Instagram into a steady, measurable source of buyer and seller enquiries.

All figures are pulled directly from the client's Meta Ads account for July 2026, the account's first and only month of delivery to date. 'Leads' are genuine Instant-Form submissions; WhatsApp conversations are reported separately as messaging conversations. Because only one month of data exists, this is a launch snapshot and is marked for review as more data accumulates.

Advertising results vary based on industry, market conditions, competition, budget, campaign history, offer, website experience, conversion tracking, and other factors. The results reflect the specific account and reporting periods shown and do not guarantee future performance.
